## Professional Summary

Backend Java Developer with 1 year of professional experience building and maintaining production backend systems using Java and Spring Boot. Experienced in REST API development, PostgreSQL optimization, authentication and authorization, microservices, production debugging, automated testing, and Dockerized deployments. Hands-on experience with Redis, AWS S3, LLM integration, RAG pipelines, vector databases, and agentic AI systems using Spring AI.

## Technical Skills

**Languages:** Java, Go, Python, C, C++, JavaScript
**Backend:** Spring Boot, Spring Security, REST APIs, Microservices, JWT, OAuth2
**AI & LLM:** Spring AI, LLM Integration, RAG, pgvector, Embeddings, AI Agents, Tool Calling
**Databases:** PostgreSQL, MySQL, MongoDB, Redis
**Testing & Tools:** JUnit, Mockito, Postman, Swagger/OpenAPI, Git, Bitbucket
**Cloud & DevOps:** Docker, AWS S3, CI/CD

## Professional Experience

**Junior Java Developer** *Nov 2025 – Present*
Restobrain.ai Pty Ltd, Darwin, Northern Territory, Australia (Remote)

- Develop and enhance production REST APIs and backend services using Java and Spring Boot.
- Optimize PostgreSQL queries and database indexes to improve backend performance and response times.
- Diagnose and resolve production issues across multiple backend modules, improving system reliability.
- Implement backend features involving authentication, business logic, database operations, third-party integrations, and service-to-service communication.
- Collaborate with a distributed engineering team to develop, test, debug, and deploy production software.

**Java Intern** *Sep 2025 – Nov 2025*
Restobrain.ai Pty Ltd, Darwin, Northern Territory, Australia (Remote)

- Built and integrated REST APIs using Java and Spring Boot for production backend services.
- Fixed backend bugs, handled edge cases, and refactored existing code to improve application stability.
- Optimized database queries and collaborated on debugging issues across multiple backend services.

## Education

**Bachelor of Computer Engineering** *2022 – 2026*
Purwanchal Engineering Campus, IOE, Tribhuvan University, Dharan, Nepal

## Projects

**AI Nexus — Enterprise AI Integration Platform** GitHub

- Built a multi-module AI integration platform using Java, Spring Boot, Spring AI, PostgreSQL, and pgvector.
- Implemented JWT/OAuth2 authentication, a Multi-LLM Gateway using the Strategy pattern, prompt management, RAG pipelines, vector search, embedding abstractions, and retriever strategies.
- Developed Agent Builder, tool calling, workflow orchestration, and observability modules for enterprise AI workflows.

**Orbit — E-Commerce Backend** GitHub

- Built REST APIs for products, carts, and orders using Spring Boot, PostgreSQL, and Redis.
- Integrated Google OAuth2 login with JWT-based authentication and role-based authorization.
- Implemented eSewa payment integration and Dockerized deployment.

**TrendMorph AI — AI-Powered Content Generation Platform** GitHub

- Developed an AI pipeline using BLIP for image captioning and a fine-tuned T5 model for social-media caption and hashtag generation.
- Integrated Speech-to-Text and Text-to-Speech capabilities using Python-based AI services.
- **Technologies:** Python, Transformers, BLIP, T5, Flask, Hugging Face, NLP
